Five Points Fire Company  
**RE:** **Sprayed Foam Roofing**

Chris,

I would like to express my thanks to Remtek Services for the spray foam roof that was installed last year on our roof at Five Points. During the time of our installation, your employees extended themselves, were cautious to our member to explain the process of your installation and completing our job in a timely and professional manor. They notified us in advance to remove our cars and or brought covers for the vehicles that were left and could not be moved. They cleaned up at the end of each day. This was impressive during construction. You also worked around our hall rental schedule.

The Five Points Fire Company is impressed with the roofing job and the difference it made in heating and cooling cost for the past year.

When we began our process of having a new roof put on our building, we learned from another Fire Company of the Spray Foam installation on the roof of their building. It had lasted for fifteen years at that time, before they had to have it recoated. This was at the end of their warranty. You told us that the manufacturer had stated that our roof installation warranty would last for 20 years and cover labor and material. This was a convincing factor.

Your company also completed guttering and metal work that we requested and were pleased with.

I will and have recommended Remtek Services to other fire companies and businesses to consider the sprayed foam roofing system. Any time you have a customer that would want to see our roof installation, please call and we will be glad to show them.

Sincerely,  
Bob Borkowski
